

AGENCY Software

a data system that puts you in control

www.agency-software.org

(253) 245-3801

Does your organization need a better system?

- Every organization needs to gather, track and report data
- Computerizing can bring powerful benefits, but the fit has to be right. Many systems are designed to meet funder or contractor needs, not the needs of your organization.
- AGENCY Software was designed by a non-profit, for non-profits. It's especially well-suited to social-service organizations.
- AGENCY can help everybody to get their job done, including direct service staff, managers and supervisors, and reporting and compliance staff. It can track information about the people you serve, your staff and your organization.
- AGENCY is 100% Free Software. No software costs, or license fees. Everyone in your organization can use it. No vendor lock-in.
- AGENCY has a demonstrated record of reliability and effectiveness. Originally created at DESC, the software is being used by Plymouth Housing Group, and Recovery Cafe is close to implementation.
- Consulting, technical support and hosting services available at agency-software.org.
- **Your organization could be the next to go AGENCY!**

For further information or inquiries about AGENCY, please contact ken.tanzer@agency-software.org, or call (253) 245-3801.
